

DIY *fall decor* Apple Votive Holder

Position a candleholder at each place setting or create a twinkling table runner for your autumn get-togethers.

1 You'll need: Apples, Votive candles, Artificial berry spray, Craft knife, Bamboo skewer or thin wooden craft stick, Spoon and Preserved Spanish moss (Not shown)

2 Place a votive candle on top of an apple and use a craft knife to trace a shallow cut around the base of the candle into the apple.

3 Cut deeper (approximately one inch) into the apple using the shallow cut as a guideline.

4 Use a spoon to scoop out the apple flesh, creating space for the votive candle.

5 Place the candle in the apple.

6 Use a bamboo skewer or wooden craft stick to insert small pieces of preserved Spanish moss into the gap between the candle and the apple.

7 Push the moss securely into the gap.

8 Use the skewer or craft stick to push small pieces of the artificial berry spray into the moss.
